

## **Setting up Captcha services for Instant Social Anarchy from Darkside.dotcomsecrets.com**

To stop automated solutions webmasters or programmers use an image system with numbers or letters on to verify you are a human and not using an automated program.

We have created a workaround system for InstantSocialAnarchy and use some of the more popular captcha deciphering systems.

**You can access the captcha configuration in InstantSocialAnarchy by following the next few steps to familiarize yourself with the setup.**

- 1. When you have open InstantSocialAnarchy from your desktop icon go to the top menu.**
- 2. Configuration > `Manage Anti Captcha Services` (Click on the `Manage AntiCaptcha Services` .)  
Ignore the bit that pops out to the right when you hover on the Manage AntiCaptcha Services dialogue for now this would be to edit already configured services**
- 3. Choose options in the dropdown `Captcha Service` to familiarise yourself with the information requested.**

**You can continue reading through this document now.**

There are 3 different captcha breaking services and each of them charges a minimal amount for their service.

When you register your key will come by email if you need one to enter into the bottom field of InstantSocialAnarchy.

You need a key to connect to all the different people in the world that sit typing captchas into a screen so you don't have to.

Some of the captchas are read by software called OCR using very detailed algorithms to decipher the captcha so these are a lot faster in reading the image you send to them.

There is sometimes a delay with the captcha servers because the image may be hard to read or due to the way to service is outsourced to third world countries or even people on mobile phones, so don't worry if your registration hangs for a second if you are using one of the services.

1. Beatcaptchas

<http://www.beatcaptchas.com/register.php>

2. Decaptcher

<http://decaptcher.com/client/>

3. Deathbycaptcha

<http://www.deathbycaptcha.com/user/login>

All of them need you to register and make a deposit but they are ridiculously cheap and will save you so much time which is of course the whole point of automation tools like InstantSocialAnarchy.
